

## DevOps In The Real World Rethink Application Development Environments

### *Topic*

The concept of defining application development environments, methodologies, processes and infrastructure has constantly evolved. Over the past decade the term DevOps has become mainstream to describe all of those aspects. Liquid will present an interactive agency's approach to DevOps, describe where we are now, present lessons learned and discuss what the future may hold.

### *Speakers*

#### **Lawrence Wolfe**

Larry has over 20 years experience in interactive media, delivering innovative and functional solutions for heavy hitters like Mack Trucks and Air Products. As our CTO and Chief Architect, Larry crosses the divide between the left and right brain to produce experiences that are compelling, easy to use and scalable.

#### **Steve Bridges**

Steve leverages over 15 years of experience building custom applications in a variety of environments, industries, and languages. He currently serves as Liquid's CIO where he strives to delight clients with unique and cost-effective solutions to their business challenges.

#### **Jon Bailer**

Jon is a technical lead at Liquid Interactive. Jon has over a decade of experience implementing custom technology solutions for a wide variety of clients.

#### **Ray Jones**

As Senior Applications Developer at Liquid Interactive, Raymond is responsible for implementing "responsiveness" to the front-end of many websites and web applications. A decade of experience in back-end programming and a degree in design are tools Raymond uses to bridge the gap between designers and developers
