

Trends in IT Infrastructure Products for Data Center and IT Rooms

Topic

The standard rack cabinets, cable management solutions and airflow management products are evolving to support the new generation of servers and network switches that are more powerful and more energy efficient. Additionally, these changes to IT Infrastructure products are driven by the need to concentrate more equipment in a smaller space to reduce capital costs. Rack Solutions will discuss how the requirements for infrastructure products has evolved in the past 3 years and how new server and cooling technologies will continue to drive changes for the traditional "racking" products.

Speaker

Dan Mantz is President of Rack Solutions. Dan joined Rack Solutions as VP of Engineering and was named President in October, 2013. Prior to joining Rack Solutions, Dan spent 20 years working with industrial robotics for FANUC Robotics in Rochester Hills, MI. Dan's last position at FANUC was Director - Product Development where he managed mechanical, electrical and application engineering departments and was responsible for global development of Paint robots, electrical control systems and application products.

Date

Wednesday, November 18, 2015

Location & Directions

The Starlight Diner, 233 N. Route 100, Allentown, PA 18106-9367. (610)395-4031. Near PA Route 100 in Fogelsville, PA, just south of the Interstate 78 exchange. Meeting room is in the back left.
