

Applications Using AV Technologies on the Network The 2015 AITP Facility Tour

Topic

The inevitable convergence between IT and Audiovisual (AV) ranges from the classroom to the boardroom. For this tour and presentation you will have an opportunity to see how the magic happens when both areas meet.

Speaker

[Dan Gundry](#): Dan has worked at Vistacom for more than 12 years, and now leads its Control Room Team, a specialty group working with mission critical agencies and partners integrating technologies into security operations centers, traffic management centers, network operation centers, command and control rooms, war rooms, data centers and similar spaces.

Dan is an experienced professional with a background in construction management and audio-visual system integration. Prior to joining Vistacom, Dan was a project engineer for a national construction management firm, and his unique understanding of applications that serve the construction and technology industries is a tremendous asset to Vistacom's high profile projects in security and surveillance, public safety and transportation.

Date
